Concepts in Developmental Psychology ... The three goals of developmental psychology are to describe, explain, and to optimize development (Baltes, Reese, & Lipsitt, 1980). To describe development it is necessary to focus both on typical patterns of change (normative development) and individual variations in patterns of change (i.e. idiographic development). Developmental Psychology | Simply Psychology Developmental psychology is the branch of psychology that focuses on how people grow and change over the course of a lifetime. Those who specialize in this field are not just concerned with the physical changes that occur as people grow; they also look at the social, emotional, and cognitive development that occurs throughout

life.
